

# **Business Management & Information Technology Department Winter Intersession Concern**

Regarding the academic calendar change (winter intersession), I disagree with it. It makes it impossible for a student with young children to come to school. We would start before kids are in elementary school so parents would not have daycare. Then we would be in school when classes begin so parents could not take their kids to school on the first day. We went to the 16-week calendar years ago so we could start AFTER school just for those reasons.
