

## Academic Integrity and Online Classes Recommendations from ISIT

- AI & Academic Integrity Product Review
  - Workgroup formed to look into software suggestions from Senate.
  - Workgroup & ISIT Recommend:
    - Honorlock
      - Per User Model
        - \$10 per user includes just Automated Proctoring
        - \$20 per user includes Automated with Live Proctoring
      - \*NOTE: FTE-based option would cost \$370K annually.
      - Includes:
        - 24/7/365 support for students, faculty, and staff.
        - Customer success manager for the life of the contract
        - 90min virtual training webinar for faculty.
        - Integrated with Canvas.
      - Other notes:
        - Taft spends \$20K annually for about 1,000 students. They use AI + Live Proctoring (\$20 per user model).
        - Mt. Sac spends \$180K, 9,000 students...looking into Full FTE Model.
        - College of the Canyons spends \$50K annually, 5,000 users, AI Only (\$10 per user model).
      - Why Honorlock over Proctorio?
        - Users noted experiencing difficulty with Proctorio.
        - Porterville College is actively looking at Honorlock and replacing Proctorio.
    - Scheduling and Testing Lab Recommendation
      - ISIT would also recommend the college look into options with scheduling that would permit online students to come to campus to take tests.
      - Provide a testing lab that provides the equipment requirements for using proctoring software.
- ISIT Charge (In approval process)
