Re: Letter of intent

I believe that I can be an asset to the BCSGA, and bring in a different new voice, from a minority point of view as a first gen Mexican American student. I also believe that the BCSGA will be able to open up many doors for me in my future that will leave an everlasting imprint on my life, and build and surround myself in a community that will be unforgettable.

I am a student who loves to involve myself in anything that I can. I have been working in the Bakersfield College counseling and advising center as a student worker for the past year and have gained and learned many skills and information on Bakersfield College while working here that I would love to share with the other students.

I also am very dedicated and while working have earned dean's list and will dedicate myself fully into anything that I do to ensure achievement. I would be no different if appointed a position. I believe the Bakersfield College student government is here to provide a safe space to all and provide its students an avenue to connect with others and help the public.
