Strategic Planning

Sept. 30 Meeting

What is Strategic Planning?

The world is changing faster, SP allows us to generate change by imagining multiple future scenarios and giving us a clear goal to work toward.

Steps to Strategic Planning

1

Scanning for Trends, (Drivers)

2

Identifying Signals

3

Generate Multiple Scenerios,

4

Feedback from the college community to pick a preferred Scenario

What are Drivers?

- S • Society
- T • Technology
- E • Environment
- E • Economic
- P • Political

What are trends in these areas that are quickly growing and affecting education? (ex: AI, inflation, political polarization)

What are signals?

A specific event or single idea that might be utilized in the future. Think of ideas that seem futuristic and innovative.

(ex: Elon Musk's brain chips that download information into your brain)

Brainstorm and report back!

Your Ideas will help
generate about 70
scenerios for the
SP Committee to
discuss!
