

Dear BCSGA,

I am interested in being a senator-at-large to help allocate funds for school events and also act as a representative of the student body. Some skills I possess for this position are my abilities to communicate effectively with my peers. I am a people person and love to talk, get to know others and work alongside others. Bakersfield College has a student government to have student representation in the school. A school can't function without the voice of the students. It is important to have a student voice when it comes to school events and have student input on where money should be spent because it is all in mind for the students. One thing I wish to take away from this experience is how to negotiate with other members of the BCSGA to make sure everyone is equally represented.
