I was unable to get to campus after being involved in a car crash while I was pregnant. I was placed on bed rest and could not work. With my car being totaled after the crash, I could not find any other way to campus considering I was suppose to be on bed rest and could not walk to the bus stop which was about a mile from where my resident of the other side of town (93313).. Please take this into conderation, as I am trying to get back into school and further my education for the future for me and my daughter.

Thank you, Daijahne' White
