

# Articulation Officer Report

Curriculum Committee Regular Meeting

September 22, 2022, 2:30 PM– 4 PM

**ASCCC Website:** Refer to the [ASCCC website](#) for ways to give your input on legislation implementation and more.

**Upper Division Coursework (AP 4237):** Administrative Procedures have been updated using the language that Mark presented to the Curriculum Committee and Academic Senate in 2020.

Since community colleges do not routinely accept upper division courses, when a petition is submitted for credit in an upper division course at one (1) of the Colleges of KCCD, each local campus has the ability to determine how they would award credit for upper division coursework, if any. However, local college evaluators are required to seek faculty assistance in determining whether or not the upper division course content satisfies lower division course requirement(s).

**C-ID updates and newsletter:** The C-ID website is not displaying all course descriptors or course approvals as of 9/16/2022. An email will be sent when the issue is resolved. C-ID sends out newsletters every quarter. Review the [Summer Newsletter](#) for important updates and requests.

**Comparable Courses:** At least one comparable course should be listed for both CSU Transfer and UC Transfer requests. [Contact the AO](#) for an ASSIST Login to help facilitate this search. Not all courses will have a comparable course. In these cases, a closer review by the Curriculum Committee may be needed.

**Credit for Prior Learning (CPL):** The Military Articulation Platform workgroup is gearing up to share processes for reviewing military training eligible for CPL. Department Chairs will receive a login and training. They may reach out to discipline faculty for specific review requests. Any faculty who wants to help pioneer the work should [contact the AO](#).

**Credit by Exam (CBE):** A plan for awarding CPL by CBE is being developed, specifically for mirrored and noncredit courses first.

Respectfully submitted,

Erica Menchaca  
Articulation Officer
