First Read Curriculum Review

Programs 11/05/26

Meeting Date	Program Title	Program Description	Program Type (B, ADT, AA, AS, CA, JSC, NC)	Request Type	Units / Hours	Start Semester
11/5/2026	Construction and Fabrication Document Technician	The Construction and Fabrication Document Technician program is an interdisciplinary program which prepares students for careers supporting construction, manufacturing, fabrication, and industrial projects through the development and management of technical documentation and project information. Through applied, hands-on experience in woodworking, construction, manufacturing, and welding, students develop an understanding of materials, fabrication processes, and assembly methods that supports the preparation, interpretation, and review of technical documentation. Students gain skills in collecting, organizing, analyzing, and communicating information used throughout project planning, design, fabrication, construction, quality control, and project closeout. The program emphasizes the use of modern documentation methods, digital technologies, industry standards, and technical communication practices to support efficient project execution and coordination. Graduates will be prepared to serve as documentation specialists, document control technicians, project coordinators, fabrication documentation technicians, and related technical support professionals in construction, manufacturing, and fabrication environments.	Associate of Science	New	60-61	Fall 2027
