

The State of California clearly articulates the minimum qualifications for anyone teaching mathematics at the Community College level. The faculty of Bakersfield College are committed to upholding the law. The Bakersfield College Math Department discovered two conclusive pieces of evidence that the MA in Math Teaching from CSU Bakersfield cannot meet minimum qualifications. First, CSU Bakersfield's Math Department testifies that the degree in question was never intended to meet the minimum qualifications. Secondly, a comparison of the CSUB MA in Math Teaching with both Masters in Math and Masters in Math Education demonstrates irreconcilable disparity in scope, depth, and content. On November 17th, 2022 the Bakersfield College Equivalency Committee considered a motion and unanimously affirmed the determination that the Master of Arts in Teaching Mathematics from CSU Bakersfield fails to meet any path to equivalency.
