Guided Pathway Report | Friday, October 11, 2019

Prepared by Andrew Haney

During the month of September, I was informed that I would be the Guided Pathway lead for ITT. Immediately upon this notification, I issued a request for a meeting with all administrative arms for this group in the ITT Pathway. Some focus points were established and assigned. We are currently working on building the faculty team for each program area and restructuring who will be responsible for each focus point.

The areas of focus for the ITT Pathway are currently under review with the exception of Certificate Issuance. We have an issue in the ITT Pathway concerning Certificate of Completions and Job Skill Certificates that are not being issued in the timely manner to our students.

This is our current action time and during our upcoming meeting, we will establish the remainder of priorities and team members.
