There are three assessments done for technology. The first assessment method is done towards the end of each semester and is focused on specfic new technology projects that have been implemented. The second assessment is done via an annual survey to all staff and students regarding technology. The third assessment is a section in the Annual Program Review form. All of this assessment information is shared with the technology committee and IT Management to guide future technology decisions.

## **Technology Priority Process**

**Technology Requests** 

From Annual Program

Recommendation

Tech Services
Review & Collation

**Technology Committee** 

Review (ISIT)

Reports to other Committees (FCDC, Ac Senate, Admin Council, College Council)

to President &

Management

Tech Services
Summarizes and
finalizes a budget

Technology requests come to the technology department and our collated and reviewed. The requests are then taken to the technology committee for further review, input and priority recommendation. The technology department finalizes the summary and adjusts budget numbers that may have changed. The priority list is then reported out at the various committees (Faculth Chairs, Adademic Senate, Admin Council and College Council). The technology priority recommendation is then made to the President/Management.

Information Used to Guide Technology Decisions

College Technology Plan

The Master Technology Plan is developed with information gathered from assessments, long-term capital plans and budget.

The College Technology Plan is also used as guidance by the technology committee for future college technology projects.
